

# **Make your sustainable housing and mobility projects a success**

# Climate protection concerns us all

Let's act together now

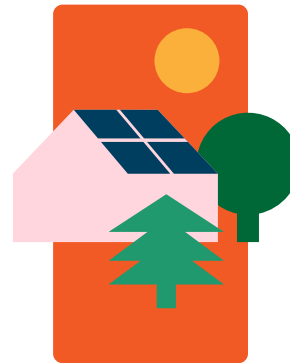

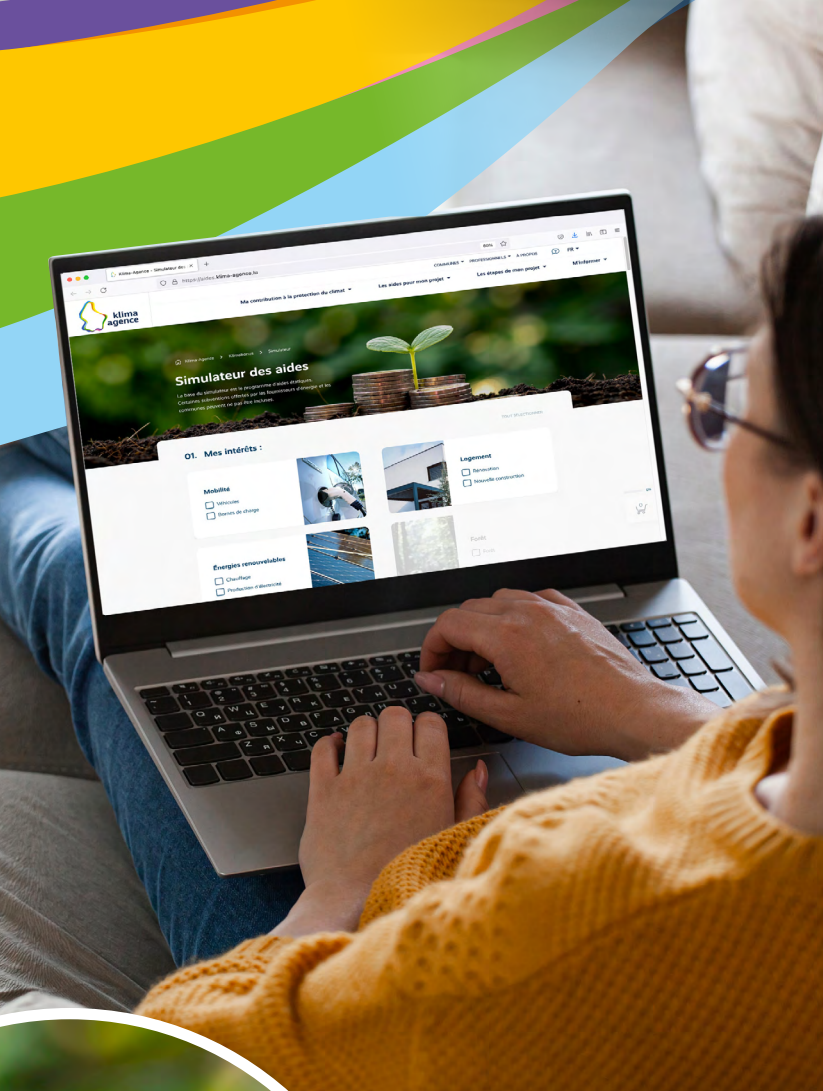

The government offers housing subsidies and a range of support measures to encourage energy-efficient renovation and sustainable construction of housing, to promote heating systems using renewable energies, to encourage investment in photovoltaics and to facilitate the purchase of electric vehicles, as well as the installation of charging stations:

- Klimabonus grants  Klimabonus
- social top-up
- climate loan

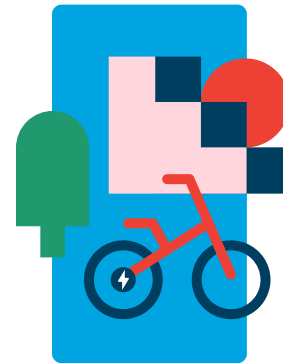

Luxembourg municipalities, energy suppliers and the fonds nova naturstrom support you to ensure the success of your projects.

# Subsidies

for your housing, sustainable mobility and biodiversity preservation project

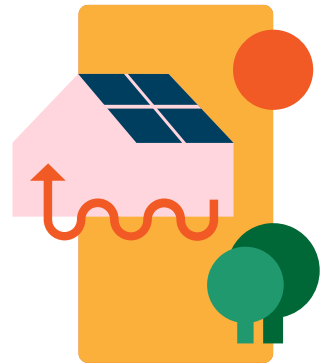

- Insulating my home
- Building my new sustainable home

- Getting around without emissions:
- Electric vehicles
  - Charging stations

- Forest protection
- Preserving biodiversity

- Generating electricity from the sun
- Heating with renewable energies
